TOOLS GitHub, VS Code, Wireshark, Netlify

CORE STRENGTHS

- UI / UX visual thinking
- Practical problem solving
- Leadership & teamwork
- Client communication
- Documentation & handoff
- Organisation & coordination

RELEVANT STUDY AREAS

- Web development & databases
- Cloud computing & networking
- AI-assisted applications
- Cybersecurity fundamentals

PROJECT DELIVERY

- Netlify deployment & testing
- CMS handoff workflows
- Client coordination & documentation

PROFESSIONAL INTERESTS

- Web & digital products
- UI/UX & interaction design
- AI-assisted tools
- Client-facing systems

PROFILE

Diploma in IT student with hands-on experience in web development, UI/UX, AI-assisted interfaces, programming, cloud fundamentals and real client project delivery. I enjoy turning requirements into clear, practical digital experiences and am seeking an internship where I can contribute while continuing to grow technically.

CLIENT PROJECT EXPERIENCE

Empower Counselling Website & Admin CMS

[Project OC & Web Developer](#) | [LEO Club community initiative](#) | 2026

Delivered a responsive public counselling website and protected admin CMS for client handoff. The client can update services, activities, media and contact information independently, while visitors can send programme enquiries through pre-filled WhatsApp messages. I supported planning, implementation, testing, deployment and final handover.

[Web](#) • [CMS workflow](#) • [Netlify](#) • [WhatsApp enquiry](#) • [Client handoff](#)

LEADERSHIP & COMMUNITY

President - FAME Student Council

2026

Coordinate event concepts, activity flow, venue arrangements, sponsorship, budgets, materials and member execution. Prepare documentation and support communication across teams.

Treasurer / Project OC - LEO Club of FAME International College

2026

Maintain finance records, support community initiatives and take project responsibility for selected service activities, including the Empower client website delivery.

SELECTED TECHNICAL PROJECTS

CampusAI Student Assistant • [HTML](#) / [CSS](#) / [JavaScript](#) / [Gemini](#)

Responsive student FAQ assistant with quick actions, chat history and AI-assisted responses.

Full-Stack Login & Registration • [Node.js](#) / [Express.js](#) / [MySQL](#)

Registration and login workflow with validation, duplicate-email checks, API requests and dashboard access.

Interactive UI Prototype • [Figma](#) / [UI](#) / [UX](#)

Desktop and mobile prototype with reusable components, visual hierarchy, navigation and interaction flows.

Cloud Infrastructure Lab • [Google Cloud](#)

Compute Engine and Cloud Storage practice with service-model responsibilities and foundational cloud security.

ADDITIONAL PROJECTS

Business Calculation & Receipt System

C++ checkout workflow with validation, discounts, payment handling and saved receipts.

Tuition Centre Management System

Python registration, subject selection, fee calculation, discounts and invoice generation.

Student Management System

Python records, mark validation, grading, search and summary statistics.

PREVIOUS WORK EXPERIENCE

Promoter & Grocery Store Assistant

[Before Diploma](#)

Customer assistance, cashier duties, product organisation, restocking, delivery support and daily store operations. Built reliability, communication, teamwork and time-management habits.

AVAILABILITY & FOCUS

Open to IT / digital internships where I can contribute to web, UI/UX, AI-assisted tools or general IT projects while learning from professional teams.
